CSinPA K-8 Pathway

Expand computer science (CS) learning at your school

A 100% virtual professional learning experience, the Pathway is designed to support K-8 educators to grow their computer science capacity.

Provided at no cost. Act 48 credit available.

Learn. Teach. Advocate.

Participants engage as learners, teachers, and CS champions (advocates) as they develop and implement a small-scale pilot project to expand CS access for students.

Open to All K-8 Educators

The Pathway is open to any K-8 educator involved with CS instruction, including:

Grade-level teachers • Content-area teachers
• Special education • ELA • Librarians •
Specialists • Instructional coaches

Ideal for Teams

While not required, it is recommended that schools engage with a team of 2+ educators to allow for collaboration throughout the Pathway.

No CS Experience Needed

Participants will:

- Access and use the K-12 CS Framework and CSTA standards
- Initiate and reflect on a small-scale implementation pilot
- Recognize and create a plan to close equity gaps in CS education, specifically for students with disabilities and other historically underrepresented populations, such as students of color and female students
- Leverage community and stakeholder partnerships
- Articulate the need for CS in education and our communities
